

Project: Cache Valley Transit Center Expansion and Improvement

Recipient: Cache Valley Transit District

Location: Logan, Utah

Purpose: The requested funds will be used to purchase property from Logan City. Once the property is secured, the Transit District will expand its facilities to accommodate for increased bus traffic, scheduled arrivals and departures and increased ridership. CVTD plays as an essential part to Cache Valley in terms of public transportation for the valleys' population. With a 55% ridership increase over the past eight years to now over 1.7 million trips annually and an operating cost of roughly one-third the national average, the Transit system plays a key role in the valley communities' ongoing efforts to improve air quality and relieve traffic congestion. Since its inception, the transit district has experienced rapid and currently unsustainable growth without additional federal resources. These funds will assist the district's efforts to keep pace with the growth in the community.

Amount: \$400,000
